Verisae Announces Election of Marty Leestma to Board of Directors

Former Accenture Partner and Software Company CEO Adds Depth and Vertical Expertise

Minneapolis, January 18, 2010 -- Verisae, the global leader of Sustainability Resource Planning (“SRP”), announces the election of Marty Leestma to the Board of Directors. Mr. Leestma is currently a consultant to growing businesses and Chairman of Forthright Solutions, a global provider of transaction processing and resolution services. He spent over 20 years with Accenture, most recently as its global managing partner for Retail and Consumer Goods & Services (CG&S) Industries.

Dan Johnson, Chief Executive Officer of Verisae, commented on the announcement. *“Marty is an excellent addition to our Board as he has over 20 years of experience in the retail space, the largest vertical market we now target. He brings both a strategic perspective as well as years of operational experience that will benefit Verisae as we seek to accelerate our growth and increase our presence and customer depth across the enterprise sustainability software market.”*

Mr. Leestma also served as Chairman and Chief Executive Officer of Retek Inc, a leading provider of enterprise software solutions to large retailers around the world. In addition to Verisae, Mr. Leestma currently serves as a director for two other Minnesota-based software companies: SPS Commerce and Shavlik Technologies.

“I am very impressed with the technology and market position Verisae has developed. I believe they are superbly positioned to be the market leader in the enterprise sustainability, energy and environmental management solutions space,” Mr. Leestma added. *“Their strength in retail plays well to my background and knowledge. I look forward to providing Dan and his team with the insights I've gained over many years addressing this large and evolving industry.”*

About Verisae, Inc.

Verisae (<http://www.verisae.com/pr>) helps measure, manage and monetize energy costs and carbon emissions. Their proven Sustainability Resource Planning (“SRP”) platform improves operational efficiency, makes sustainability initiatives actionable, and reduces energy costs and emissions for distributed enterprises. Verisae delivers a broad range of sustainability solutions to over 40 global clients with a service network of over 7,500 third-party consultants and over 60,000 application users. Their integrated sustainability platform actively tracks over 2.1 million assets across 23,000 sites.
